December 19, 1996

To whom it may concern,

I am Teresa Cornish, Water Treatment Technician and District Representative for Chemgard Inc. (Greenville, South Carolina). In August of 1996, Chemgard Inc. acquired General Nutrition Products Corp. (Greenville, South Carolina) account for water testing, treatment and consultant services. It was in August of 1996 that I was introduced to Fred Weberking, Maintenance Technician and newly assigned employee responsible for the plant boiler room logistics. I have worked closely with Fred in a concerted effort to rectify a history of water conditioning problems with the plant boiler, water chillers and cooling towers. Fred has shown to me a very keen interest in working with myself in water analysis and water treatment. I have greatly appreciated Fred's input and I can stand as a witness to Fred's constructive modifications, productive improvements and reorganizational methods he has implemented in the plant boiler room to better its operation and function.

This is my testimony to Fred Weberking's working relationship with myself. I found him to be competent, conscientious and self motivated to install good ideas of plant boiler room operational logistics. I recommend him.

Signed,

Teresa Cornish  
District Representative  
Chemgard Inc.
