December 15, 1999.

To whom it may concern:

I sent forth the letter of recommendation on behalf of Fred Webberking. Fred has professionally and personally supported me in our core process at Alfmeier Corporation in Greenville, South Carolina the past one year. He has participated in lean manufacturing workshops and has applied the principles and concepts of continuous improvement as leader of the maintenance group. Fred is currently responsible for all aspects of both TPM (Total Productive Maintenance) and Autonomous Maintenance supporting \$ 20 million in worldwide automotive fuel systems. Fred is an experienced team player, proficient in all aspects of equipment machinery and tooling on the manufacturing floor adhering to QS9000 standards. A pro-active team member and leader with a record of developing people to reach their full potential. Fred fully supports both his internal and external customers.

Yours truly,

John F. Petak

Manufacturing Manager
