Anderson, South Carolina 29622

To whom it may concern,

I have worked closely with Fred Webberking for the past three months since he was assigned to dept. 213 (Micro-relays), and it is with utmost sincerity and confidence that I recommend him for a technician position here at Robert Bosch.

Fred is most certainly technically proficient. He possesses a keen ability to identify machine problems, and tailor solutions to them. He has been a tremendous asset to the department because of his experience and all of the different skills that he possesses. He has demonstrated to be proficient in mechanical problems, electrical problems, machining, fabricating, and troubleshooting.

The strength of my recommendation does not rest on Freds evident technical abilities alone. He also possesses the attitude that everything can be improved and he is always working towards that goal.

Sincerely,  
Mike Woodall  
Shift Coordinator  
Dept. 213  
(864-260-8666)
