

① STANDARD BASED PROBLEM SOLVING IMPROVEMENT WORKFLOW MODEL – IS THERE A STANDARD?

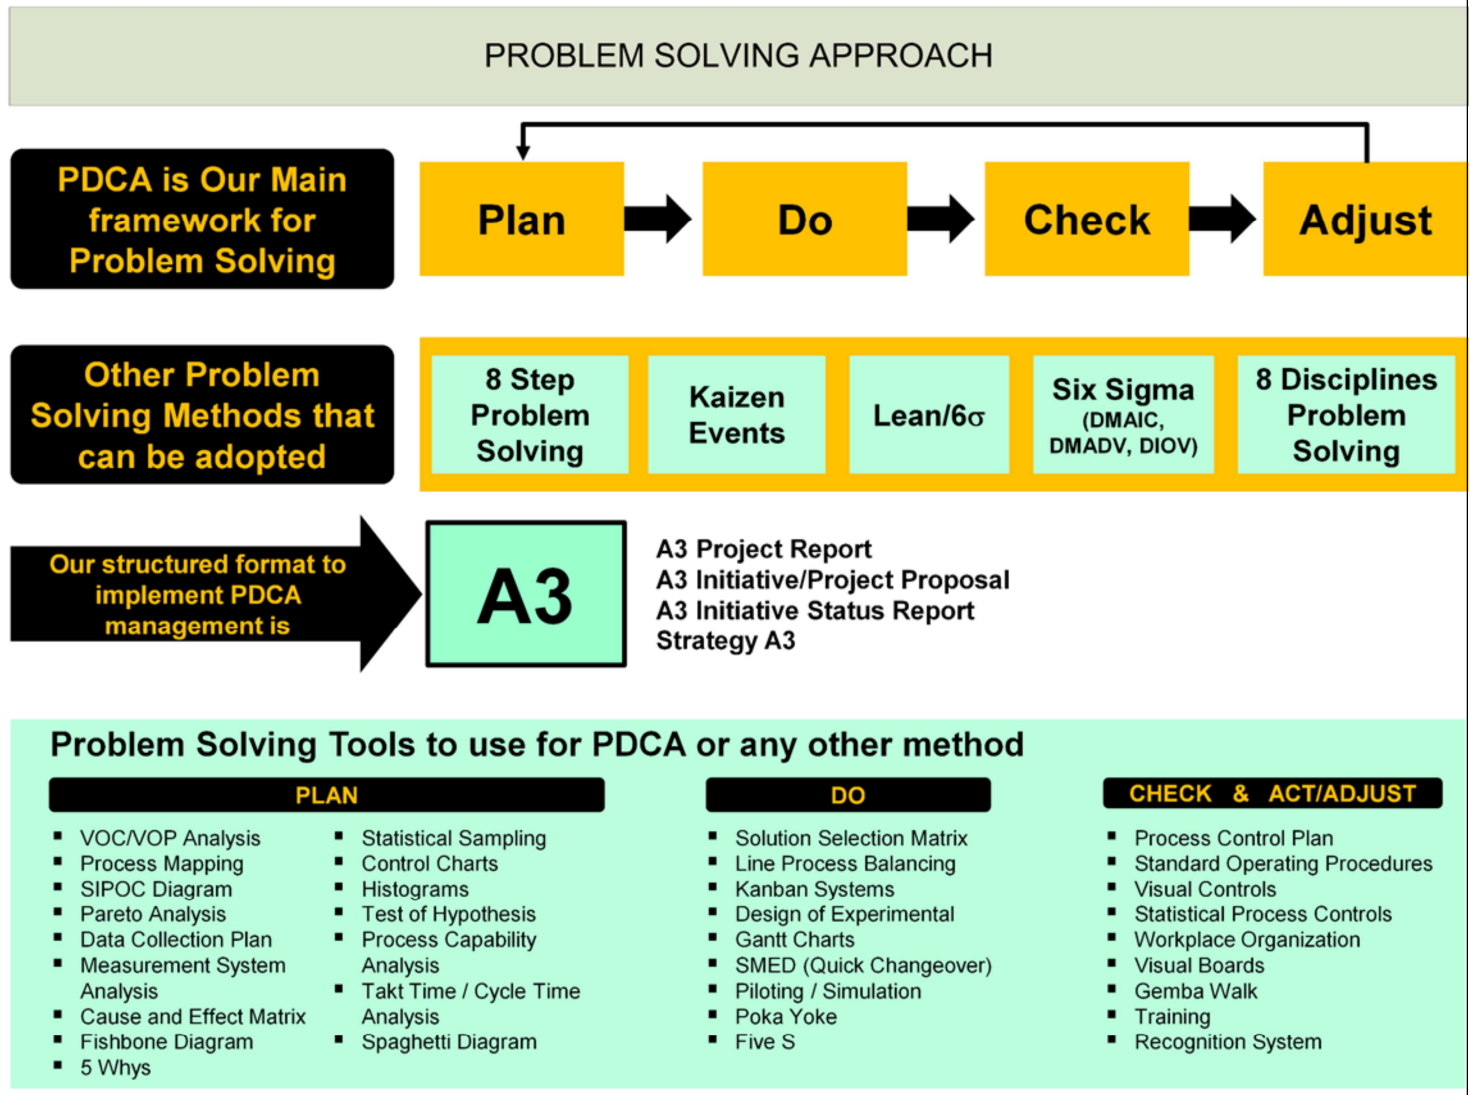

Problems! Problems! Problems! There's a school of thought that says problems are good. There was a time when I was on a quest to find a universal problem solving method, process, tool or approach and I have found that there isn't one. Good problem solving involves participation of a team of people and engagement in real time activity based problem solving workshops.

TOPS = Team Oriented Problem Solving

In this series of illustrations I created large 36" X 48" and plotter printed sheets of problem solving steps. The participants using marker pens and post-it notes activity engage with the information and data as it unfolds during the course of phases of the problem solving investigation. One of the more obvious reasons for such a manual way of using poster size paper, post-it notes and marker pens is that it appeals to the 3 learning styles of: Auditory learning, Visual learning and Kinesthetic learning.

This is the problem solving flow chart model.

Problem solving model. No matter how complex I get down into creating a problem solving plan I never forget to ask myself: “does this complete the P.D.C.A cycle? Here I am using a form of DMAIC six sigma process.

DMAIC = Define, Measure, Analyze, Improve, Control.

① - ③ - ④ PROBLEM DESCRIPTION – CURRENT CONDITION

| | |
|---------------------------|--|
| PROBLEM STATEMENT | |
| CURRENT PERFORMANCE LEVEL | |
| DESIRED PERFORMANCE LEVEL | |

① - ③ - ④ WHAT IS THE IMPACT ON THE ORGANIZATION?

| | | |
|-----------|-------------|--------------------------------------|
| + | SAFETY | HOW MUCH? HOW MANY? HOW OFTEN? _____ |
| Q1 | QUALITY | HOW MUCH? HOW MANY? HOW OFTEN? _____ |
| D | DELIVERY | HOW MUCH? HOW MANY? HOW OFTEN? _____ |
| \$ | FINANCIAL | HOW MUCH? HOW MANY? HOW OFTEN? _____ |
| E | ENVIRONMENT | HOW MUCH? HOW MANY? HOW OFTEN? _____ |

Here we are defining the problem statement and what impact or impacts has it has had to the organization.

2) PROBLEM BREAKDOWN

Pareto Chart (1st Level)

Pareto Chart (2nd Level)

Pareto Chart (3rd Level)

Part of the Define Analyze process is to capture information and data surrounding the problem under study.

4 MAP THE PROCESS TO LOCALIZE THE POINT OF OCCURRENCE

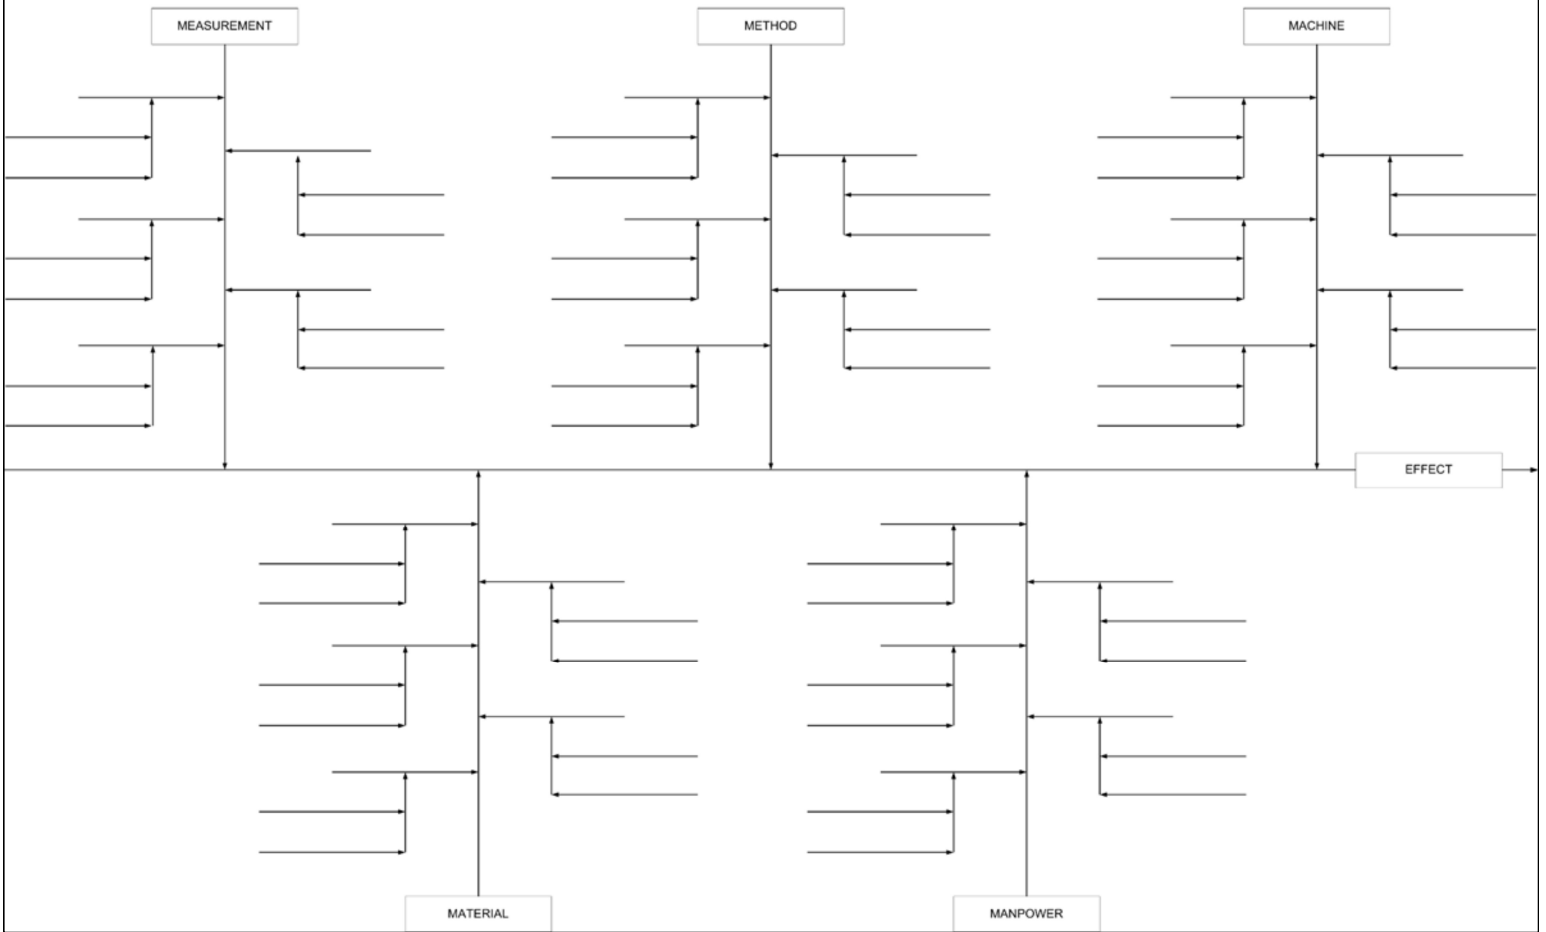

Map the process using functional flow block diagrams

④ FIND THE ROOT CAUSE – FISHBONE DIAGRAM

PROBLEM DESCRIPTION

EFFECT

During the Analyze phase you look at factors and causal factors.

① FIND THE ROOT CAUSE LOGIC TREE - MANPOWER

Manpower

Cause and effect logic tree using the 5 Whys method. Do the same for the other 5 Ms of **Machine** – **Material** – **Method** – **Measurement**. I designed this to scale for the 36" X 48" sheet so that the WHY and PROBLEM boxes when plotted out on the printer are the size of the 3" X 3" and 4" X 6" post-it notes.

4 FIND THE ROOT CAUSE LOGIC TREE - MEASUREMENT

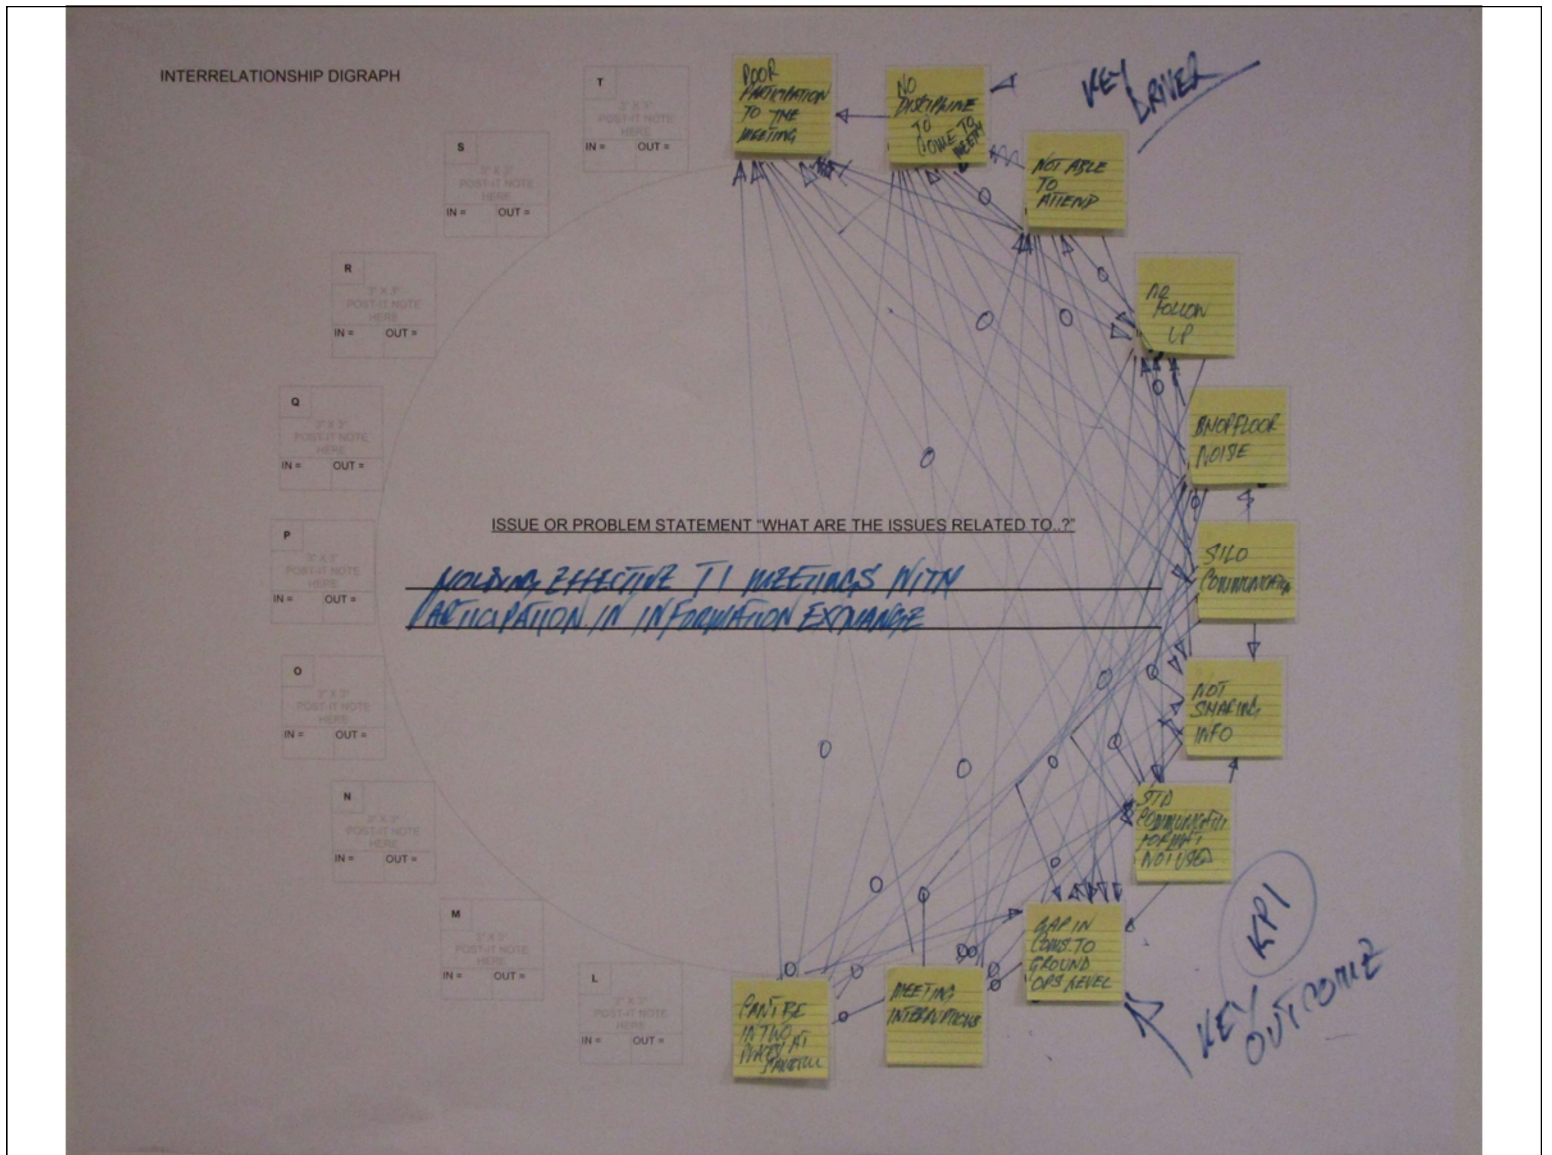

Measurement

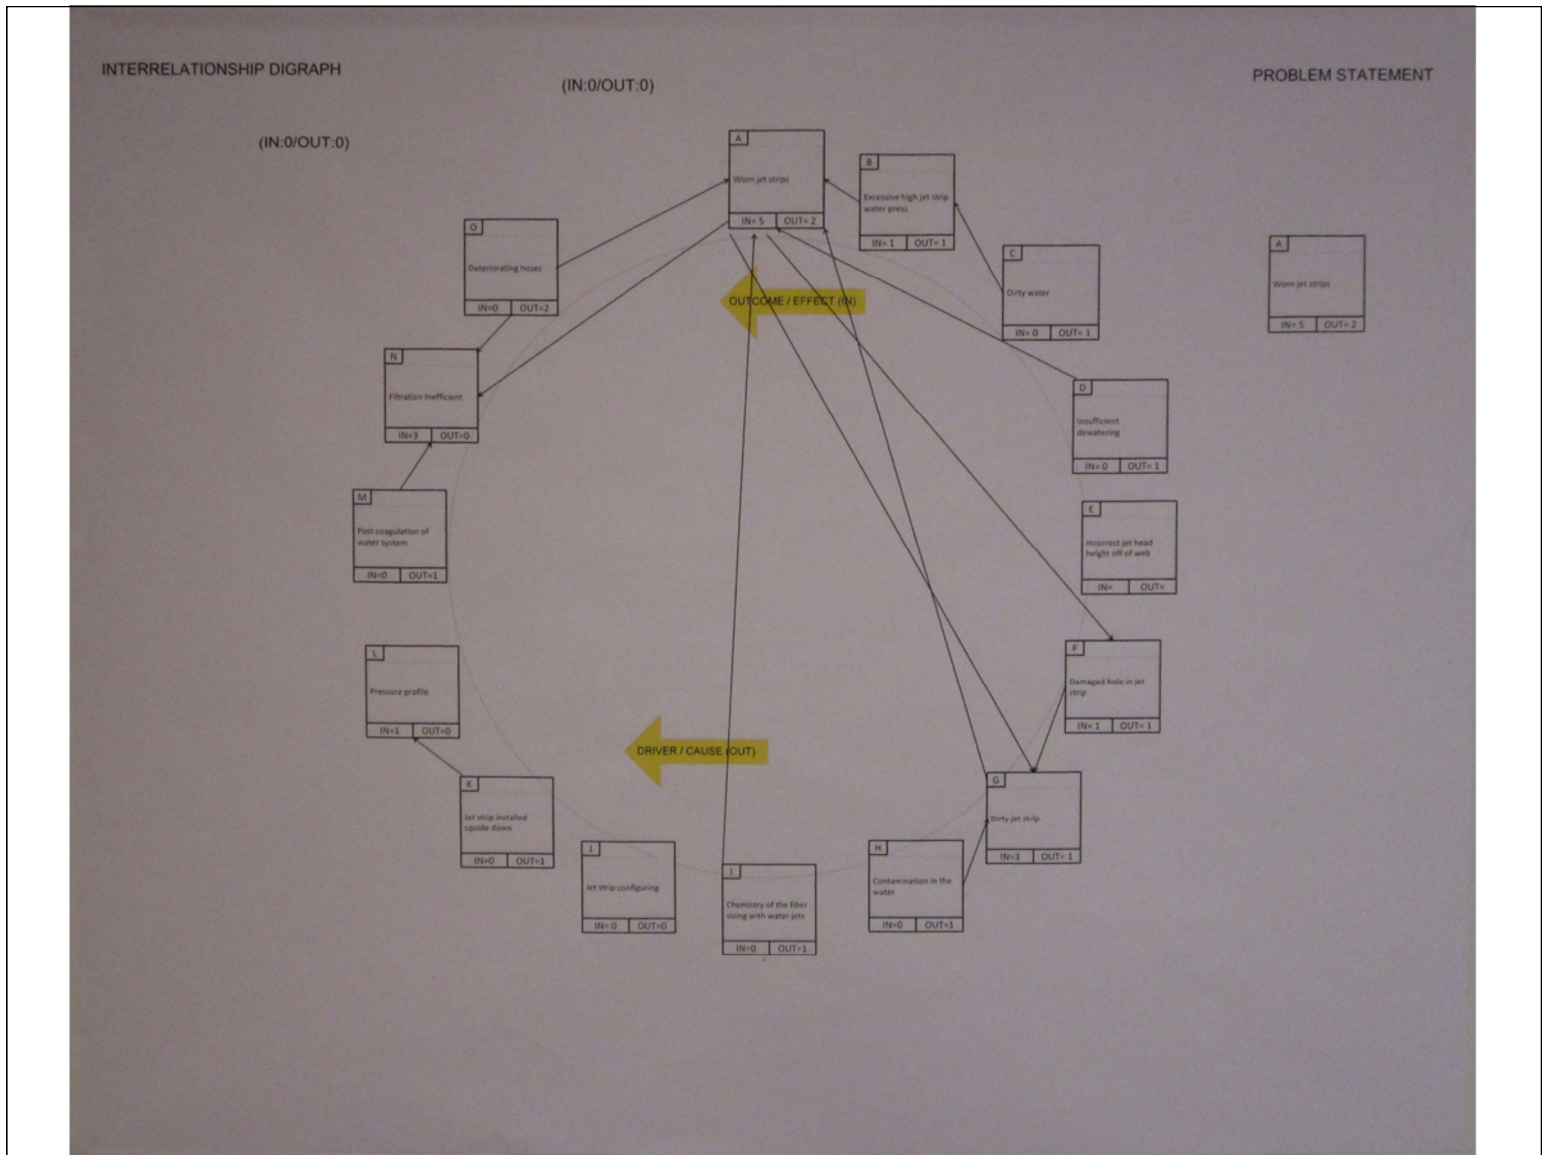

INTERRELATIONSHIP DIGRAPH

My own plotter printer sized interrelationship digraph.

Real example of my digraph in use during allowing a team to systematically identify, analyze and classify the **Driver** and **Outcome** relationships that exist among all critical issues so that those **Key Drivers** and **Key Outcomes** can become the heart of an effective solution.

Real example of my digraph in use during allowing a team to systematically identify, analyze and classify the **Driver** and **Outcome** relationships that exist among all critical issues so that those **Key Drivers** and **Key Outcomes** can become the heart of an effective solution.

⑤ DEVELOP COUNTERMEASURES ACTIONPLAN

| # | CORRESPONDING 5M FACTOR & NUMBER | IMPROVEMENT PLAN | PRIORITIZATION FACTORS (USING THE PRIORITIZATION TABLE TO EVALUATE EACH PLAN) | | | | PRIORITIZATION SCORE |
|----|----------------------------------|------------------|--|------------------|------------------------|----------------|----------------------|
| | | | IMPACT ON KPI | IMPACT ON SAFETY | EASE OF IMPLEMENTATION | FINANCIAL COST | |
| 1 | | | | | | | |
| 2 | | | | | | | |
| 3 | | | | | | | |
| 4 | | | | | | | |
| 5 | | | | | | | |
| 6 | | | | | | | |
| 7 | | | | | | | |
| 8 | | | | | | | |
| 9 | | | | | | | |
| 10 | | | | | | | |
| 11 | | | | | | | |
| 12 | | | | | | | |
| 13 | | | | | | | |
| 14 | | | | | | | |
| 15 | | | | | | | |
| 16 | | | | | | | |
| 17 | | | | | | | |
| 18 | | | | | | | |
| 19 | | | | | | | |
| 20 | | | | | | | |
| 21 | | | | | | | |
| 22 | | | | | | | |
| 23 | | | | | | | |
| 24 | | | | | | | |
| 25 | | | | | | | |
| 1 | LOW 3 | MEDIUM 6 | HIGH | | | | |

Improvement plan. Again, this is all manually done with writing it by hand on the plotted sheet of paper.

| ⑤ IMPROVEMENT PLAN | | | | | | |
|--------------------|-----------------------|---------------|-------------|------------------|----------------|----------|
| # | WHAT TO CHANGE (ITEM) | ACTUAL (FROM) | FUTURE (TO) | EXPECTED RESULTS | ACTUAL RESULTS | COMMENTS |
| 1 | | | | | | |
| 2 | | | | | | |
| 4 | | | | | | |
| 5 | | | | | | |
| 6 | | | | | | |
| 7 | | | | | | |
| 8 | | | | | | |
| 9 | | | | | | |
| 10 | | | | | | |

This captures specifications that need to be changed. Remember P.D.C.A. If you change something test it first to make sure that it doesn't have negative affects for up or downstream processes or your customer's processes.

⑥ RECURRENCE PREVENTION CONTROL PLAN

| # | CORRESPONDING 5M FACTOR & NUMBER | CONTROL PLAN – TASK – ACTIVITY | CONTROL PLAN TASK ACTIVITY TIME LINES | | | PROGRESS | | | |
|----|----------------------------------|--------------------------------|---------------------------------------|---------------------|-------------------|----------|-----|-----|------|
| | | | ASSIGNED RESPONSIBLE PERSON | EXPECTED START DATE | EXPECTED END DATE | 25% | 50% | 75% | 100% |
| 1 | | | | / / | / / | | | | |
| 2 | | | | / / | / / | | | | |
| 3 | | | | / / | / / | | | | |
| 4 | | | | / / | / / | | | | |
| 5 | | | | / / | / / | | | | |
| 6 | | | | / / | / / | | | | |
| 7 | | | | / / | / / | | | | |
| 8 | | | | / / | / / | | | | |
| 9 | | | | / / | / / | | | | |
| 10 | | | | / / | / / | | | | |
| 11 | | | | / / | / / | | | | |
| 12 | | | | / / | / / | | | | |
| 13 | | | | / / | / / | | | | |
| 14 | | | | / / | / / | | | | |
| 15 | | | | / / | / / | | | | |
| 16 | | | | / / | / / | | | | |
| 17 | | | | / / | / / | | | | |
| 18 | | | | / / | / / | | | | |
| 19 | | | | / / | / / | | | | |
| 20 | | | | / / | / / | | | | |
| 21 | | | | / / | / / | | | | |
| 22 | | | | / / | / / | | | | |
| 23 | | | | / / | / / | | | | |
| 24 | | | | / / | / / | | | | |
| 25 | | | | / / | / / | | | | |

If you change it how are you going to control it. Who is going to do what? By when? Follow up.

⑦ & ⑧ RECURRENCE PREVENTION EVALUATE RESULTS & STANDARDIZE THE IMPROVEMENT PROCESS

| TRAINING NEEDS | | | | | |
|----------------|---------------------|-------|-----------------------------|---------------------|-------------------|
| # | REGISTRATION NUMBER | TITLE | ASSIGNED RESPONSIBLE PERSON | EXPECTED START DATE | EXPECTED END DATE |
| 1 | | | | / / | / / |
| 2 | | | | / / | / / |
| 3 | | | | / / | / / |
| 4 | | | | / / | / / |
| 5 | | | | / / | / / |
| 6 | | | | / / | / / |
| 7 | | | | / / | / / |
| 8 | | | | / / | / / |
| 9 | | | | / / | / / |
| 10 | | | | / / | / / |
| 11 | | | | / / | / / |
| 12 | | | | / / | / / |

| STANDARDS – SPECIFICATIONS – WORK INSTRUCTIONS – PROCEDURES – FORMS TO BE UPDATED | | | | | |
|---|---------------------|-------|-----------------------------|---------------------|-------------------|
| # | REGISTRATION NUMBER | TITLE | ASSIGNED RESPONSIBLE PERSON | EXPECTED START DATE | EXPECTED END DATE |
| 1 | | | | / / | / / |
| 2 | | | | / / | / / |
| 3 | | | | / / | / / |
| 4 | | | | / / | / / |
| 5 | | | | / / | / / |
| 6 | | | | / / | / / |
| 7 | | | | / / | / / |
| 8 | | | | / / | / / |
| 9 | | | | / / | / / |
| 10 | | | | / / | / / |
| 11 | | | | / / | / / |
| 12 | | | | / / | / / |

Recurrence prevention. This is where you fix the system that allow the mistake, error to occur. It may be updating the PFMEA or upgrading a work instructions, updating or upgrading a control plan or improving a weakness in design to either eliminate the problem or detect it.

⑨ LESSONS LEARNED

1
